Operational Guidelines - Natural, Cultural, Park Users and Neighbours

Resource	Guidelines
ALL	Brief all personnel involved in containment line construction for vehicle based fire suppression operations, on site locations and the required management strategies appropriate to the site type.
FMM 4.2.7	There are no Aboriginal sites in the part of OWRNP that is shown on this map sheet. Aboriginal sites have been categorised with the following protective actions if possible in the event of a fire. AH1 - As far as possible, protect site from fire. Do not cut down trees. AH2 - As far as possible, protect site from fire. Avoid all ground disturbance including the use of earthmoving machinery, hand tool fire correction and diving over site. Avoid water bombing which may cause ground disturbance. AH3 - Avoid all ground disturbance. Avoid water bombing. Site may be burnt by sunlight, back-burn or prescribed burn without damage.
Historic Heritage Management	There are no heritage sites in the part of OWRNP that is shown on this map sheet.
Threatened Fauna Management	There are no threatened fauna issues on this map sheet that require protective actions in the event of a fire. As far as possible, protect large and hollow-bearing trees. Avoid inter-fire intervals of <10 years. Avoid high intensity fires that consume canopies and fallen logs. Where practicable, protect habitat areas and trees from the fire if the effects of the resulting fire frequency, season &/or intensity will have a significant or unknown impact. Substrata may be used except where location is within 50m of a watercourse, dam or swamp. All existing threatened frog records are displayed as an exclusion zone (50m exclusion of substrata and other fire suppression chemicals).
Threatened Flora Management	There are no threatened flora issues on this map sheet that require protective actions in the event of a fire. As far as possible, avoid inter-fire intervals of <10 years. Where possible, protect old growth habitat trees. Substrata may be used except where location is within 50m of a watercourse, dam or swamp.
Threatened Property	No threatened property associated with this map sheet. If possible strengthen AH2 areas around park assets prior to the arrival of wildfire and if possible defend them from fire. Where possible, property owners with assets at risk from a wildfire event should be kept informed regarding the progress of the fire. No smoke management issues identified.
Smoke Management	No visitor management issues identified.
Visitor Management	No specific warnings.
